TEAM NAME : NINJA TURTLES

MEMBERS :

1. JAYESH KAUSHIK NARAYANA REDDY
2. RANJITHA VADIVEL
3. SELA KOSHY
4. CLINTON ANTONY RAJASEKAR
5. SRUJANA DEVULAPALLY

USE CASE:

The use case aims to predict if a female patient of Pima Indian heritage aged at least 21 years has diabetes or not based on diagnostic measurements. The objective is to develop a model for early diagnosis, intervention, and treatment of diabetes. This is important because diabetes is a serious condition that affects many people worldwide, and early diagnosis can prevent complications and improve patient outcomes.
